RNL CONSTRUCTIONS
ABN: 73 142 461 694 QBCC 1188568

HSEQ NEWSLETTER Q3 2026

As part of our consultation duties and aligned with our ISO 14001, ISO 45001 and ISO 9001 certified management systems, we are providing this quarter's HSEQ update for all subcontractors working with RNL Constructions. This update focuses on your obligations as a contractor and reinforces the standards required when operating on our sites.

We appreciate the efforts of all contractors who continue to meet their compliance obligations and provide outstanding service. Your cooperation helps us maintain our ISO certifications and deliver high-quality, safe and environmentally responsible projects for our clients.

If you require clarification on any of the items below, please contact us. Have a great quarter!

KEY REMINDER – YOUR RESPONSIBILITY AS A CONTRACTOR

All subcontractors engaged by RNL Constructions are responsible for ensuring your own safety, environmental and quality systems are implemented and followed on every site. This includes:

- ✓ Providing current SWMS, licences and competency evidence
- ✓ Ensuring your workers are inducted, supervised and using the correct PPE
- ✓ Managing your team's fatigue, fitness for work and behaviour
- ✓ Ensuring waste is sorted, works are tidy and materials are handled responsibly
- ✓ Delivering work in line with the scope and applicable Australian Standards

RNL will continue to monitor compliance and may request copies of SWMS, licences etc as required.

FEEDBACK

We value feedback from our contractors as part of our commitment to continuous improvement across safety, quality and project delivery.

We encourage everyone to provide feedback, suggestions or raise any concerns relating to:

- Site communication and coordination
- Scheduling and project management
- Safety processes and site conditions
- Quality expectations and documentation
- Contractor onboarding and compliance requirements
- General working relationships and project delivery

Your feedback assists us in identifying opportunities for improvement and helps ensure we continue building strong working relationships and efficient project outcomes for everyone involved. Feedback can be provided at any time by contacting our office team or project supervisors.

WHAT WE ARE CHECKING THIS QUARTER

Before starting work, take a few minutes to check the site and make sure the conditions, scope and information are right for the work you are about to undertake.

STOP if something doesn't look right or conditions have changed.

CHECK your SWMS, scope, materials, equipment and work area before proceeding.

REPORT anything unexpected including hazards, damage, access issues, changes to the scope or anything that could affect the safety or quality of the work.

A quick conversation or photo before work starts can prevent injuries, rework, delays, property damage and unnecessary costs.

If it doesn't look right, don't just work around it. Stop, check and report.

Your commitment to compliance and safe work practices plays an important role in helping us maintain a safe, efficient and high-quality working environment across all projects.
